

**ABSTRACT**

An e-mail address change notification deputization system has a first provider server in which a first e-mail address of a client is set;

a second provider server in which a second e-mail address of the client is set; and

an address change notification deputization service server,

wherein the first provider server transfers an e-mail that is sent to the first mail address to the second provider server upon receiving this e-mail,

wherein the second provider server transfers an e-mail that has been transferred from the first provider server to the address change notification deputization service server upon receiving this e-mail, and

wherein the address change notification deputization service server checks the path of the e-mail that has been transferred from the second provider server and makes a notification to the sender of the e-mail to the effect that the e-mail address of the client is the second mail address in the case that this e-mail is received by the second provider server after transferred by the second provider server.
